

R6L Patroller

The R6L Patroller has been designed to accommodate tactical Picatinny Rails and VAS shroud for attaching extra equipment. It has a larger shell than the other R6 Series helmets, which also makes it a great choice for larger head sizes due to the increased internal space. Our own PMI version comes with Picatinny rails for mounting accessories, and a VAS Shroud for mounting accessories such as night vision goggles.

Key Features

- DuPont™ Kevlar® and fiberglass reinforced composite shell
- Ratchet adjustable headband
- 4-point chin strap with low profile buckle and chin cup
- Water release holes
- Picatinny rails
- VAS shroud
